# MANUFACTURING CAPABILITIES

Based along the banks of the River Lagan in Northern Ireland, our offices and manufacturing facilities are situated on our own 17.5 acre site.

Manufacturing our entire range in our factory is key to our strategy. As we are in full control of our supply chain, this also enables us to manage the quality of our products and we can adapt quickly and easily to customer requirements.

Our extensive facilities allow us to offer flexibility in the products we manufacture and we can create OEM products for your business if required.

Unicorn Group have placed significant investment into improving our manufacturing processes – we have injection moulding machines, 3D Printing, steel cutting and forming capabilities adjoined to our warehouse where we keep large volumes of materials and stock.

Our team includes engineers and designers who are constantly striving to produce new and innovative products to ensure our customers can retain a competitive edge by using our product ranges. We offer a bespoke design service on all refills and customisable options are available on dispensers and bins.

Unicorn Group and it's subsidiary companies have achieved both ISO 14001 and ISO 9001 certification. Both certifications ensure that effective processes and management are in place to consistently deliver excellent products. It also recognises the overall efficiencies of our business and demonstrates our commitment to minimising the impact of our business on the environment.

# CORPORATE RESPONSIBILITY

At Unicorn Group, we are committed to operating a socially and environmentally responsible business. This ethos has guided how we run all our operations - from the manufacturing and production process to the materials in our products and lighting in our offices, and it will continue to do so. We believe that the small changes we introduce to our businesses can make a big difference. We continue to look for the best ways to reduce our environmental footprint and improve the future sustainability of our environment. Sustainability truly is at the heart of everything we do here at Unicorn Group.

## REDUCING OUR CARBON FOOTPRINT:

- As our company and operations evolve, so do our sustainability practices. The recent move to our new Riverview offices, situated along the River Lagan in Northern Ireland provided the ideal opportunity to review all our processes in line with our sustainability goals.
- Unicorn Group have placed significant investment into improving our manufacturing processes across all our brands.
- These improvements have enabled us to minimize the environmental impact of our production activities across all areas of the business.

## CARBON FOOTPRINT: IMPROVING OUR WAYS OF WORKING

- Installation of new equipment to help minimise the environmental impact of our machines
- Onsite PVC regrind and recycling centre
- Energy efficient heat source and controls
- Recycled raw materials
- Energy efficient KPI's
- Energy saving lighting
- 100% of our electricity generated from renewable resources with Power NI

## MICROAIR

Microair is a durable washroom air freshening system that employs advanced technology to continually deliver lasting fragrance to your chosen area.

The compact Microair is fully automated and programmable, meaning customers can tailor the operating hours to suit their needs and deliver fragrances at maximum efficiency. The Microair can be programmed to dispense a wide range of specially formulated fragrances designed to quickly and effectively neutralise any unwanted odours.

### FEATURES:

- A choice of 30, 45, 60 or 90 day service intervals
- Fully programmable to optimise usage during working hours
- Customisable with company logo
- Wide range of fragrances available
- Built in spirit level to ensure an accurate installation
- Wires hidden to stop tampering
- Keyed or un-keyed lock
- Default settings and custom programming
- Countdown to next spray

## SANAIR

Sanair Air Freshener and Cleaner & Deodoriser is a revolutionary 2 in 1 dispenser aimed at consistently keeping urinals/WC's clean as well as delivering fragrance into the air.

The Sanair is designed to provide a continuous flow of fluid into the urinal/WC, preventing the formation of bacteria whilst releasing a fresh fragrance to counteract any airborne malodours.

Designed with a convection chamber, the Sanair provides a continuous fragrance in the air throughout your washroom area.

The Sanair helps reduce limescale build-up in toilets and urinals, minimising cleaning costs and improving general hygiene.

### FEATURES:

- Non aerosol air freshener system
- Open systems to allow air flow
- Programmable for 30 or 60 days
- Wide range of fragrances available
- Bio refills available
- Customisable with company logo

# HOW IT WORKS

Specially formulated fluid dispenses from the bottle and flows down the chevron channel.

Some of the fluid is absorbed by the wick.

**Cleaners & Deodorisers**  
Specially formulated fluid dispenses from the bottle and flows down the chevron channel. Some of the fluid is absorbed by the wick. The remaining fluid collects in the well, when it reaches the spillway level, it flows down through the connected pipes and into the WC/Urinal. Air passes through the convection chamber and evaporates fluid from the wick material, providing a continuous fragrance in the air.

The remaining fluid collects in the well, when it reaches the spillway level, it flows down through the connected pipes and into the WC/Urinal.

Every flush produces a concentrated and fragrant foam, which reduces germs and surface stains and therefore eliminating the bad smell at source.

The formulations also help dissolve uric acid, which clog and block internal pipes and pipelines. Helping maintain and enhance pipe lifespan.

# CLEANERS & DEODORISERS

## PURESAN

The Puresan provides a continuous dose of fluid into the urinal/WC to freshen your washroom areas by eliminating bad odours and reducing bacteria and germs.

The refill formulations are designed to combat the build-up of germs, which normally accumulate on washroom surfaces, including urinals and WC's.

The Puresan dosing system is easily programmable, giving you control over its service frequency.

Puresan dispenser offers a unique benefit in being able to be installed up to half a metre below a cistern. Ideal for those tricky installations where the cistern is close to the roof.

### FEATURES:

- Programmable for 30 or 60 days
- Wide range of fragrances available
- Bio refills available
- Customisable with company logo
- Can be installed up to 1/2 metre below a cistern
- Closed system

# CLEANERS & DEODORISERS

## ODOURCLEAN

The OdourClean is a gravity drip fed system which dispenses fluid into the urinal/ WC providing cleaning and deodorising properties, whilst reducing further bacteria formation. This system assists in eliminating offensive odours and reducing stains within washrooms.

The OdourClean dispenser does not contain any motors or batteries, making it a more cost effective solution.

### FEATURES:

- Gravity operated
- Wide range of fragrances available
- Installation parts available
- Customisable with company logo

REFILLABLE  
BOTTLES

1 YEAR  
WARRANTY

# HOW IT WORKS

The bottle is refilled as required, mixing a dose of a concentrated formulation and water. The ratio of the dilution will depend on the intensity required. The bottle is then placed inside the dispenser, depressing the needle in the cap allowing the fluid to flow into the reservoir up to the level of the bottle cap. The bottle is then placed inside the dispenser, depressing the needle in the cap allowing the fluid to flow into the reservoir up to the level of the bottle cap.

The wick will absorb the fluid, transferring it from the reservoir to the pipe. The pipe is either connected to the cistern or directly into the urinal/WC.

The flow is regulated by the J-pipe allowing the user to slow down or speed up the flow, adjusting the service intervals as needed.

The concentrate fluid is fragranced to offer a clean and fresh washroom and has a cleaner to reduce the growth of bacteria.

Fragrances

# FRAGRANCES

# FRAGRANCES

Unicorn Hygienics manufacture a wide range of tailored fragrances which have been developed using feedback from customers in over 30 countries. Having created a fragrance range that caters to all markets, Unicorn Hygienics can guarantee a scent that will be both effective and pleasant in any washroom across the globe.

## FRAGRANCE RANGES:

- Classic collection
- Citrus collection
- Floral collection
- Seasonal collection

### Malodour Counteractant Technology

Our fragrances contain a malodour counteractant innovative technology. Rather than masking odours they neutralise the active malodour molecules and replaces them with the desired fragrance. These reduce at least 70% of the malodour perception.

### Fragrance Consistency

Most of our fragrances are available throughout our dispenser range, allowing you to experience the same fragrance in the air freshener and cleaner & deodoriser, avoiding a fragrance clash.

### Christmas Range

Every winter, we offer a range of Christmas fragrances to give your washrooms the festive feel!

# URINAL TREATMENT & URINAL MATS

Urinal Treatments & Mats

# URINAL TREATMENT & URINAL MATS

## **Powersolve**

The fast acting Powersolve quickly breaks down organic waste in urinals and shower cubicles.

Powersolve is a highly concentrated formulation that also helps to remove odours by dissolving the build up of waste and materials in toilets, urinals and shower cubicles.

100% biodegradable, the sachets dissolve upon contact with water, removing any build up of waste materials after just one treatment.

### **FEATURES:**

- Fast acting – results after just one treatment
- Breaks down organic waste and build up
- Removes odours
- 100% bio-degradable

## **Aroma Mat**

Aroma Mat urinal screen releases active ingredients over 30 days to keep the urinal and washrooms smelling clean and fresh. It's design features protrusions on the top that diffuse the urine stream while releasing a pleasant fragrance.

It includes an easy reminder system which works by removing the tabs upon installation to set your replacement date.

### **FEATURES:**

- Lasts 30 days
- Variety of fragrances available
- Easy reminder system
- Fits all urinals
- Odour control
- Anti - splashback

Disposal

**DISPOSAL**

# DISPOSAL SANIBIN

The Sanibin has a slim, compact design which enables it to be placed in the most confined toilet/washroom areas. It incorporates a lateral opening system which increases the usable capacity, whilst reducing the likelihood of waste blockage internally.

With an in-built discretion flap, your customers can also contain both the contents of the bin and any unwanted odours that may occur – leaving their washroom area clean and fresh.

## FEATURES:

- Narrow design fits into most washrooms
- Pedal operated
- Safety lid mechanism that prevents the lid from coming off in the event of falling over
- Can be customised with screen-printed logo
- Carrying handle which allows 4 bins to be carried at one time

White

Grey

# DISPOSAL SANITARY BAG HOLDER & PAPER BAGS

Perfect for communal washroom areas, hygiene bags are made available to place used sanitary items inside before disposing them into an appropriate bin.

Acting as a discreet and convenient sanitary disposal method, the dispenser is simple to install in any washroom environment.

## FEATURES:

- Individual paper bags
- White ABS plastic holder
- 2000 bags per pack
- Easy to dispense

# DISPOSAL SACKHOLDER

The Sackholder model is an exceptionally robust, practical waste disposal unit, available in both 17 and 92 litre capacities.

This bin employs a foot pedal opening mechanism to help reduce the spread of germs.

Manufactured from zintec steel, the Sackholder undergoes a post production multistage degreasing and washing process, providing superior durability and ease of maintenance throughout its functional lifespan.

Sackholder bins are available with a range of coloured lids to accommodate various waste streams and disposal purposes.

## STANDARD FEATURES:

- 1mm steel thickness
- Pedal operated
- Base plate support
- Choice of coloured lids

## OPTIONAL FEATURES:

- Vinyl personalisation
- Castor kit

## FINISHES:

Standard white with coloured lids available upon request.

# DISPOSAL MODULAR BIN

The Modular Bin is a removable bodied, fire-resistant disposal unit available in both 17 and 64 litre capacities.

Designed with ease of usage and functionality in mind, customers can quickly remove the main section to easily clean the bin and empty its contents. The bin's base plate section also reduces the chance of leakage – minimising the risk of slippage and injury.

Manufactured using Zintec Steel, the Modular Bin undergoes a multistage degreasing and washing process, giving it superior durability and ease of maintenance throughout its functional lifespan.

## STANDARD FEATURES:

- 1mm steel thickness
- Pedal operated
- Base plate support
- Choice of colours

## OPTIONAL FEATURES:

- Vinyl personalisation
- Castor kit
- Hands free version

## FINISHES:

Standard white. Other colours available upon request.
