UNICORN GROUP OVERVIEW

Unicorn Hygienics is part of Unicorn Group, a dynamic manufacturing business based in Northern Ireland.

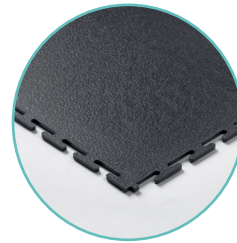

Unicorn Group has four companies within it's company portfolio, supplying a range of high quality products to a wide network of customers across various sectors throughout the world.

Global manufacturer and supplier of washroom solutions and hygiene products

Europe's leading manufacturer of PVC interlocking floor tiles, represented by two brands, Ecoloc and Flexi-Tile

Manufacturer and designer of medical sackholders for the Health Sector and internal & external street litter bins.

Manufacturer of bespoke guttering and rainwater solutions for both contemporary and historic buildings

GLOBAL PARTNERS

We work with hundreds of customers globally, including United Kingdom, Ireland, Spain, Portugal, Italy, France, Belgium, Netherlands, Sweden, Norway, Australia, USA, Chile, India, UAE, Bulgaria, Greece, Qatar, Jamaica, Puerto Rico, Austria, Colombia, Kuwait, China.

UNICORN HYGIENICS

ABOUT US

Unicorn Hygienics is a **global supplier** and **manufacturer** of products designed specifically for washroom service companies.

Our extensive product portfolio includes **vending machines** and **consumables**, **air fresheners**, **urinal sanitisers**, **disposal bins**, **urinal treatments** and **hand sanitiser**. We also supply a wide range of dispensers designed specifically to support the **Period Dignity Initiative**.

Our products are manufactured and produced to the **highest standards** in our factory in Northern Ireland. We provide bespoke **washroom solutions** and **period products** to ensure our customers retain a **competitive edge** with a range of **exciting** and **innovative products**.

Unicorn Hygienics aim to help **improve efficiency** for customers by supplying them with products that are **easily installed** and **serviced**. We develop **long-term partnerships** built on **trust & support**, and can provide **expert advice** and **solutions** to customers in the washroom sector. With a **multilingual team** we can cater to a wide range of customers globally.

With more than **30 years** in the industry, our entire product range is **manufactured in-house** to **ISO standards**, allowing us to take control over **rigorous quality assurance procedures** as well as supply **leading products** in a **time-effective manner**. Unicorn Hygienics is proud to have achieved the **PAS 2060 Carbon Neutral Standard**.

Global Reach

CARBON NEUTRAL MANUFACTURER

Based along the banks of the River Lagan in Northern Ireland, our offices and manufacturing facilities are situated on our 17.5 acre site. Unicorn Hygienics has achieved the PAS 2060 Carbon Neutral Standard, demonstrating our commitment to a more sustainable future.

Manufacturing our entire range in our factory is key to our strategy. As we are in full control of our supply chain, this also enables us to manage the quality of our products and we can adapt quickly and easily to customer requirements.

Our extensive facilities allow us to offer flexibility in the products we manufacture and we can create OEM products for your business if required.

Unicorn Group has placed significant investment into improving our manufacturing processes – we have injection moulding machines, 3D Printing, steel cutting and forming capabilities adjoined to our warehouse where we keep large volumes of materials and stock.

Our team includes engineers and designers who are constantly striving to produce new and innovative products to ensure our customers can retain a competitive edge by using our product ranges. We offer a bespoke design service on all refills and customisable options are available on dispensers and bins.

Unicorn Hygienics and its subsidiary companies have achieved both ISO 14001 and ISO 9001 certification. Both certifications ensure that effective processes and management are in place to consistently deliver excellent products. It also recognises the overall efficiencies of our business and demonstrates our commitment to minimising the impact of our business on the environment.

CORPORATE RESPONSIBILITY

At Unicorn Group, we are committed to operating a socially and environmentally responsible business. This ethos has guided how we run all our operations - from our manufacturing and production processes, to the materials in our products and lighting in our offices. We believe that the small changes we introduce to our businesses can make a big difference. We continue to look for the best ways to reduce our environmental footprint and improve the future sustainability of the environment. Sustainability truly is at the heart of everything we do here at Unicorn Group.

REDUCING OUR CARBON FOOTPRINT:

- As our company and operations evolve, so do our sustainability practices. The move to our riverview offices in 2021, situated along the River Lagan in Northern Ireland provided the ideal opportunity to review all our processes in line with our sustainability goals.
- Unicorn Group has placed significant investment into improving our manufacturing processes across our brand portfolio.
- These improvements have enabled us to minimise the environmental impact of our production activities across all areas of the business.

CARBON FOOTPRINT: IMPROVING OUR WAYS OF WORKING

- PAS 2060 carbon neutral verified
- Manufactured to ISO standards in our Carbon Neutral factory
- Installation of new equipment to help minimise the environmental impact of our machines
- Onsite PVC regrind and recycling centre
- Energy efficient heat source and controls
- Recycled raw materials
- Energy efficient KPI's
- Energy saving lighting
- 100% of our electricity generated from renewable resources with Power NI

AIR FRESHENERS

AIR FRESHENERS

MICROAIR

Microair is a durable washroom air freshening system that employs advanced technology to continually deliver lasting fragrance to your chosen area.

The compact Microair is fully automated and programmable, meaning customers can tailor the operating hours to suit their needs and deliver fragrances at maximum efficiency. The Microair can be programmed to dispense a wide range of specially formulated fragrances designed to quickly and effectively neutralise any unwanted odours.

FEATURES:

- A choice of 30, 45, 60 or 90 day service intervals
- Fully programmable to optimise usage during working hours
- Customisable with company logo
- Wide range of fragrances available
- Built in spirit level to ensure accurate installation
- Wires hidden to prevent tampering
- Keyed or un-keyed lock
- Default settings or custom programming
- Countdown display until next spray

CLEANERS & DEODORISERS

Cleaners & Deodorisers

CLEANERS & DEODORISERS

SANAIR

Sanair air freshener and cleaner & deodoriser is a revolutionary 2 in 1 dispenser aimed at consistently keeping urinals/WC's clean, as well as delivering fragrance into the air.

The Sanair is designed to provide a continuous flow of fluid into the urinal/WC, preventing the formation of bacteria whilst releasing a fresh fragrance to counteract any airborne malodours.

Designed with a convection chamber, the Sanair provides a continuous fragrance in the air throughout your washroom area.

The Sanair helps reduce limescale build-up in toilets and urinals, minimising cleaning costs and improving general hygiene.

FEATURES:

- Non aerosol air freshener system
- Open systems to allow air flow
- Programmable for 30 or 60 days
- Wide range of fragrances available
- Bio refills available
- Customisable with company logo

HOW IT WORKS

Specially formulated fluid dispenses from the bottle and flows down the chevron channel.

Some of the fluid is absorbed by the wick.

Specially formulated fluid dispenses from the bottle and flows down the chevron channel. Some of the fluid is absorbed by the wick. The remaining fluid collects in the well, when it reaches the spillway level, it flows down through the connected pipes and into the WC/Urinal. Air passes through the convection chamber and evaporates fluid from the wick material, providing a continuous fragrance in the air.

The remaining fluid collects in the well, when it reaches the spillway level, it flows down through the connected pipes and into the WC/Urinal.

Every flush produces a concentrated and fragrant foam, which reduces germs and surface stains and therefore eliminating the bad smell at source.

The formulations also help dissolve uric acid, which clog and block internal pipes and pipelines. Helping maintain and enhance pipe lifespan.

CLEANERS & DEODORISERS

PURESAN

The Puresan dispenser provides a continuous dose of fluid into the urinal/WC to freshen your washroom area and eliminate bad odours, whilst also helping reduce the effects of bacteria and germs.

The refill formulations are designed to combat the build-up of germs, which normally accumulate on washroom surfaces, including urinals and WC's.

The Puresan dosing system is easily programmable, giving you control over its service frequency.

The Puresan dispenser offers a unique benefit in being able to be installed up to half a metre below a cistern. Ideal for those tricky installations where the cistern is close to the roof.

FEATURES:

- Programmable for 30 or 60 days
- Wide range of fragrances available
- Bio refills available
- Customisable with company logo
- Can be installed up to 0.5 metre below a cistern
- Closed system

CLEANERS & DEODORISERS

ODOURCLEAN

The OdourClean dispenser is a gravity drip fed system which dispenses fluid into the urinal/WC providing cleaning and deodorising properties, whilst helping to reduce further bacteria formation. This system assists in eliminating offensive odours and reducing stains within washrooms.

The OdourClean dispenser does not contain any motors or batteries, making it a more cost effective solution.

FEATURES:

- Gravity operated
- Wide range of fragrances available
- Installation parts available
- Customisable with company logo

REFILLABLE
BOTTLES

1 YEAR
WARRANTY

HOW IT WORKS

The bottle is refilled as required, mixing a dose of a concentrated formulation and water. The ratio of the dilution will depend on the intensity required. The bottle is then placed inside the dispenser, depressing the needle in the cap allowing the fluid to flow into the reservoir up to the level of the bottle cap. The bottle is then placed inside the dispenser, depressing the needle in the cap allowing the fluid to flow into the reservoir up to the level of the bottle cap.

The wick will absorb the fluid, transferring it from the reservoir to the pipe. The pipe is either connected to the cistern or directly into the urinal/WC.

The flow is regulated by the J-pipe allowing the user to slow down or speed up the flow, adjusting the service intervals as needed.

The concentrate fluid is fragranced to offer a clean and fresh washroom and has a cleaner to reduce the growth of bacteria.

FRAGRANCES

Fragrances

FRAGRANCES

Unicorn Hygienics manufacture a wide range of fragrances across our Air Freshener and Cleaner & Deodoriser ranges. We have developed our scents based on feedback from customers in over 30 countries. Having created a fragrance range that caters to all markets, Unicorn Hygienics can guarantee a scent that will be both effective and pleasant in any washroom or public area across the globe.

FRAGRANCE RANGES:

- Woody collection
- Fresh collection
- Citrus collection
- Seasonal collection

Malodour Counteractant Technology

Our fragrances contain a malodour counteractant innovative technology. Rather than masking odours they neutralise the active malodour molecules and replaces them with the desired fragrance. Reduces at least 70% of the malodour perception.

Fragrance Consistency

Most of our fragrances are available throughout our dispenser range, allowing you to experience the same fragrance in the air freshener and cleaner & deodoriser, avoiding a fragrance clash.

Seasonal Range

We supply a range of fragrances including seasonal favourites for all occasions such as Christmas and Summer scents.

URINAL TREATMENT & URINAL MATS

Urinal Treatments & Mats

URINAL TREATMENT & URINAL MATS

Powersolve

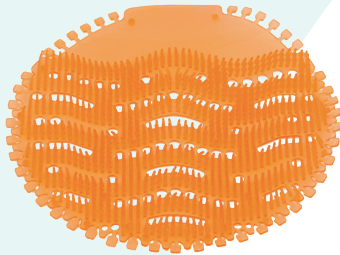

The fast acting Powersolve tab quickly breaks down organic waste in urinals and shower cubicles.

Powersolve is a highly concentrated formulation that also helps to remove odours by dissolving the build up of waste and materials in toilets, urinals and shower cubicles.

100% biodegradable, the sachets dissolve upon contact with water, removing any build up of waste materials after just one treatment.

FEATURES:

- Fast acting – results after just one treatment
- Breaks down organic waste and build up
- Helps to remove odours
- 100% biodegradable

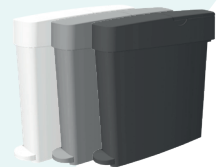

Aroma Mat

Aroma Mat urinal screen releases active ingredients over 30 days to keep the urinal and washrooms smelling clean and fresh. It's design features protrusions on the top to diffuse the urine stream while releasing a pleasant fragrance.

It includes an easy reminder system which works by removing the tabs upon installation to set your replacement date.

FEATURES:

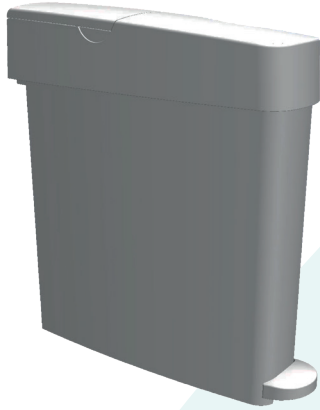

- Lasts 30 days
- Variety of fragrances available
- Easy reminder system
- Fits all urinals
- Odour control
- Anti - splashback

Disposal

DISPOSAL

DISPOSAL SANICARE SANITARY BIN

The Sanicare sanitary bin features a slim and sleek design and has been produced using antimicrobial technology within the trap which helps improve surface hygiene, reduces the growth of bacteria by up to 99% and helps prevent the spread of germs. Sanicare is made with material that is 100% recyclable and has been produced with a front-facing trap so it can be placed on both sides of toilet cubicles. This provides greater flexibility and ease of use to both servicing teams and end users. The quick-release lid ensures quick and easy servicing.

FEATURES:

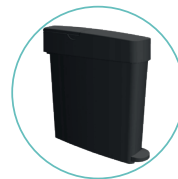

- Produced with antimicrobial technology to help reduce bacteria by up to 99%
- The Sanicare range is produced from recyclable materials
- Charcoal Grey option made from 100% recycled material
- Slim design
- Front facing trap
- Quick and easy to service
- Integrated handle
- Suitable for use with our antimicrobial sanitary liners
- Smooth interior finish
- Additional carrying bracket available

DISPOSAL SANITARY BAG HOLDER & PAPER BAGS

Perfect for communal washroom areas, hygiene bags are made available to place used sanitary items inside before disposing them into an appropriate bin.

Acting as a discreet and convenient sanitary disposal method, the dispenser is simple to install in any washroom environment.

FEATURES:

- Individual paper bags
- White ABS plastic holder
- 2000 bags per pack
- Easy to dispense

DISPOSAL MODULAR BIN

The Modular Bin is a removable bodied, fire-resistant disposal unit available in both 17 and 64 litre capacities.

Designed with ease of use and functionality in mind, customers can quickly remove the main body to easily clean the bin and empty its contents. The bin's base plate section also reduces the chance of leakage – minimising the risk of slippage and injury.

Manufactured using Zintec Steel, the Modular Bin undergoes a multistage degreasing and washing process, giving it superior durability and ease of maintenance throughout its functional lifespan.

STANDARD FEATURES:

- Produced from high grade zintec steel
- Pedal operated
- Base plate support

OPTIONAL FEATURES:

- Vinyl personalisation
- Castor kit
- Silent closing

FINISHES:

Standard white finish. Other colours available upon request.

DISPOSAL

ANTI-MICROBIAL SANITARY BIN LINERS

Anti-Microbial Sanitary Bin Liners provide a hygienic and convenient solution for the disposal of sanitary waste products. The liners include Biomaster® anti-microbial product protection which helps to reduce the growth of bacteria on the liners by up to 99.99%. The liners are also produced using a fresh floral additive which helps to reduce any unpleasant odour. The combination of the Biomaster® product protection and the floral additive removes the need for additional chemicals and helps improve site servicing times.

PRODUCT INFORMATION:

- White Anti-Microbial Sanitary Bin Liners
- Produced with Biomaster® Product Protection which reduces the growth of bacteria by up to 99.99%
- Fresh and clean floral scent helps reduce odours
- Hygienic solution for the disposal of sanitary waste products

SPECIFICATION:

- Dimensions: 615mm x 590mm
- 100% recyclable
- 25 liners per roll
- Box quantity: 10 rolls per box
