CLEANER & DEODORISER RANGE

Puresan & Sanair dispenses a measured dose of fluid automatically into the urinal/WC providing cleansing and deodorising properties, whilst preventing further bacteria formation. Our dispensers assist in eliminating offensive odours and reducing stains within washrooms.

What problems can Puresan and Sanair solve?

- Bad odours as a result of urine deposits & organic material in pipes
- Dirt and stains in toilets and urinal porcelain
- Infection from sprinkled water
- Inhibits the growth of bacteria and the build-up of lime scale formation in porcelain, pipes and pipelines.
- Costs associated with additional cleaning products
- Reduction in the number of manual cleaning/servicing calls

Programmable dispensers:

- 30 days service program sprays every 6.5 minutes
- 60 days service program sprays every 13 minutes

LEDs operation:

- Normal use: Green LED flashes once every 1.5 seconds.
- Battery warning: Red LED flashes once every 1.5 seconds when battery has 2 month life remaining.
- Refill replacement: Green LED flashes once every 3 seconds when refill is empty.

AUTOMATIC PROGRAMMABLE DISPENSER

PURESAN: CLEANER & DEODORISER

Dispenser Dimensions

Height	Width	Depth	Weight
220mm	145mm	800mm	800gms
ABS Glossy Body with Polycarbonate lens			

Puresan is the automatic programmable dispenser – an excellent solution to reduce bacteria and eliminate bad odours from urinals/WC.

Features:

- Operates with 310ml refill
- Dispenses into 1 Urinal/WC
- Operates on 2 x 'D' Cell long lasting batteries
- Smooth surface to reduce dust build-up
- Spirit level to ensure unit is fixed accurately
- Wires hidden to stop tampering
- Keyed lock
- Graphic area to allow units to be customised with company logo
- Window to protect graphic

SANAIR OPERATION: 2 IN 1 SYSTEM

AIR FRESHENER

Booster

Sanair accommodates a special cubicle for an extra refill. The booster provides a continuous fragrance, consistent with the aroma of the cleaner & deodoriser fluid, by means of an absorbent wick.

- Fluid sprays out of the bottle in a stream spray
- Some of the fluid is dispersed into the air as vapour
- Some of the fluid coats the absorbent incense tray which promotes gradual vapourisation through the use of the chevron channels
- The remaining fluid is transferred onto an absorbent wall in the form of a wick, allowing further vapourisation to take place through the air generated from the convection chamber
- Fluid is transferred by the absorbent wall (wick) to a lower tray where there are two drainage outlets
- Air travels up through the convection chamber

CLEANER AND DEODORISER

Hygienic Surfaces

Every flush produces a concentrated and fragrant foam, eliminating germs and reducing surface stains and deposits in the urinal porcelain micro-pores.

Automatic Dispenser

Sanair dispenser doses a hygienic formulation that automatically and continuously flows through the urinals and pipes. Bacteria is created every 20 minutes, the Sanair formulation combats these bacteria 24 hours per day, 365 days a year.

Free Pipelines

Sanair formulations help dissolve deposits, which clog and block internal pipes and pipelines; this is the main cause and source of offensive washroom odours.

PURESAN & SANAIR REFILLS

CATALOGUE OF FRAGRANCES AVAILABLE

LONG LASTING
NON HAZARDOUS
EXTENSIVE RANGE

FRAGRANCE CONSISTENCY:

All our fragrances are available throughout our entire washroom range (Puresan, Sanair, Purescreen, Puress & Microair)

Sanair and Puresan powerful formulations have been carefully combined to prevent the growth of bacteria, viruses, fungus, germs which is the main source of bad odours.

Our formulations keep urinals clean reducing the accumulation of uric salts, limescale and stains.
