

REVEALED: THE NEW £1 COIN DESIGN

How does it affect your vending?

Coming into circulation in 2017

With just over a year to go until the release of the new £1 coin, we want to give you a brief overview of what this means for your in relation to your vending needs. This is relevant for our **Autovend** and **Multivend** machines.

The release means that the new £1 coin will eventually filter out the old £1 coin and that venders need to be aware of this and be able to reprogramme their machines to compensate for this.

How to Reprogramme your Multivend

- Make sure the battery is connected
- Open the door of multivend
- **Press C** on the internal key pad to activate machine, the LCD should show **000**
- Enter **F733 019 428 205 233 478 422F**
- The LCD display should revert back to **000**.
- Your machine is now set up to read the **old** and **new** £1 coin.

How to Reconfigure your Autovend

The escutcheons on the Autovend will need replaced. Once this has been performed the machine will be ready to take both the current and new one pound coin. Please contact our team now to order **your new £1 escutcheons**.
